Dark Pools Scott Patterson, 2012-06-12 A news breaking account of the global stock market's subterranean battles Dark Pools portrays the rise of the bots artificially intelligent systems that execute trades in milliseconds and use the cover of darkness to outmaneuver the humans who've created them In the beginning was Josh Levine an idealistic programming genius who dreamed of wresting control of the market from the big exchanges that again and again gave the giant institutions an advantage over the little guy Levine created a computerized trading hub named Island where small traders swapped stocks and over time his invention morphed into a global electronic stock market that sent trillions in capital through a vast jungle of fiber optic cables By then the market that Levine had sought to fix had turned upside down birthing secretive exchanges called dark pools and a new species of trading machines that could think and that seemed ominously to be slipping the control of their human masters Dark Pools is the fascinating story of how global markets have been hijacked by trading robots many so self-directed that humans can't predict what they'll do next

Doing Business in 2005, 2005 Doing Business in 2005 Obstacles to Growth is the second in a series of annual reports investigating the scope and manner of regulations that enhance business activity and those that constrain it New quantitative indicators on business regulations and their enforcement can be compared across more than 130 countries and over time The indicators are used to analyze economic outcomes and identify what reforms have worked where and why Topics in Doing Business in 2005 include Licensing and Inspections Having registered a business now what In most countries firms face a myriad of sector-specific licenses as well as inspections to enforce compliance The Doing Business database constructs two sets of indicators on the regulation of operations One measures the steps time and costs of complying with licensing and permit requirements for ongoing The other assesses the enforcement of regulations through two of the most common types of inspections labor and tax Registering Property Property registries were first developed to help raise tax revenue What was good for the tax authorities has since proven to be good for strengthening property rights the registries strengthen incentives to invest facilitate trade and expand access to credit New indicators cover the steps time and cost to register property Measures of the legal provisions that strengthen property rights and the efficiency of property registries are also

developed Protecting Investors Corporate governance issues are often thought to affect only publicly listed companies in developed countries In fact corporate governance is relevant for every large privately held company that has more than one owner New indicators examine several possible types of shareholder expropriation including related party transactions guarantees and loans to company managers and directors mergers and acquisitions disclosure of ownership information and treatment of conflicts of interest Including a new emphasis on gender Doing Business not only provides insights into business constraints throughout the world but highlights particular barriers faced by women Doing Business is a comprehensive resource that no investor economic adviser business developer or economic policymaker should be without **Food**

Composition Data H. Greenfield,2012-11-02 About twenty years ago there was a recognition in Europe that real benefits would flow from coordinating the manner in which food composition tables were produced in the various countries of Europe Subsequent development of computerised nutritional data bases has further highlighted the potential advantages of working together Such cooperation could lead to improved quality and compatibility of the various European nutrient data bases and the values within them This realisation was one of the driving forces behind the development of the Eurofoods initiative in the 1980 s when those people in Europe interested in data on food composition began working together This initiative received further impetus with the establishment of the Eurofoods Infant Concerted Action Project within the framework of the FLAIR Food Linked Agro Industrial Research Programme of the Commission of the European Communities It was quickly recognised that the draft guidelines for the production management and use of food composition data which had been prepared under the aegis of INFOODS International Network of Food Data Systems a project of the United Nations University would be especially applicable to the objectives of the Concerted Action The guidelines have been written by two recognised experts Many people associated with FLAIR Eurofoods Infant have added constructive criticism and advice to that offered previously by those associated with INFOODS Thus the guidelines are backed by a consensus in the community of those responsible for the production and use of food composition tables and nutrient data bases **Pervasive**

National Socialism Daniel Gasman, 2017-07-12 Many studies of the origins of National Socialism claim that the völkisch and proto Nazi movement arose largely as a reaction to the materialistic ideas of nineteenth century science and especially to the naturalistic philosophy of Ernst Haeckel and the German Monist League Using hitherto unexplored material Daniel Gasman calls this generalization into question Arguing that the importance of science has been relatively neglected in accounts of the intellectual origins of Nazism he attempts to show that Haeckel's scientific Darwinism and his movement the German Monist League were proto Nazi in character Contrary to popular belief Haeckel's type of social Darwinism actually played a critical role in the formation of National Socialist ideology In his new introduction Gasman notes that recent research goes far to confirm Haeckel's role as an ideological progenitor of fascist ideology This is true not only for Germany

but also for the birth of fascist thought in Italy and France In general Gasman claims the history of science plainly reveals how Haeckel s social Darwinism nourished the roots of fascism no less than avant garde modernism When The Scientific Origins of National Socialism initially appeared the Times Literary Supplement called it a very well argued thesis that is completely successful and leaves the reader to extract his own moral lessons Medical History in its review of The Scientific Origins of National Socialism said His book is essential for understanding modern Germany It has a general message derived from the events in Germany where scientific data were permitted to take on a mystical significance with ghastly consequences Bruce Chatwin in the New York Review of Books called the book brilliant Now available in paperback with a new introduction by the author this seminal work will be of interest to intellectual historians as well as th
